## Exquisite. STONE BY STONE.

Genuine stones give these **GEOCUBE®** models their vibrancy: sage green aventurine or lilac amethyst, each contrasted with marbled landscape jasper, white howlite and black onyx.

Finished with fine synthetic tiger's eye, sparkling Swarovski® Crystals and rose gold stainless steel.

The sage green, multi-strand nappa leather bracelet perfectly complements the sophisticated bangle made from rose gold stainless steel with pale green pavé crystals.

# 20 years of GEOCUBE®.

## THE ANNIVERSARY EDITION.

On the occasion of the 20th anniversary of the  
**GEOCUBE®** line, COEUR DE LION is launching  
the limited edition '**GEOCUBE®20**', a tribute  
to the first **GEOCUBE®** model from 1999.

Originally made of semi-matte cubes, its  
vibrant anniversary update features brilliant  
Swarovski® crystals in multicolour.

A close-up photograph of a woman with blonde hair and blue eyes, looking slightly to the side. She is holding a large, faceted, rose-gold diamond-shaped object in her right hand. The object has a complex, multi-faceted design, resembling a large diamond or a piece of jewelry. A bright light reflects off one of its facets, creating a starburst effect. She is wearing a white top and a necklace made of small, colorful, square beads. The background is dark and out of focus.
